

The Speedpass⁺™ app

What is it?

The Speedpass⁺™ app is new mobile payment technology from ExxonMobil. The app provides consumers with a fast, easy and convenient way to pay for fuel and car wash purchases using their smartphones. The app is available for Apple® and Android™ devices.

What does it do?

Consumers can download the Speedpass+ app for free from the App StoreSM or the Google Play™ Store. With the Speedpass+ app, consumers can:

- Find an Exxon or Mobil branded station
- Pay for fuel and car wash transactions
- Store receipts and car wash codes
- And much more

How does it work?

The Speedpass+ app obtains your location from your mobile phone through its geo-location feature. If your location-based services are turned on, the Speedpass+ app will be able to use it to identify which station you are at. If your location-based services are turned off, or there is interference, you will be directed to scan the QR code.

Paying for fuel and car wash transactions using the Speedpass+ app is simple and convenient:

- Open the Speedpass+ app on your smartphone
- Select 'Pay for Fuel'
- Select your pump number or scan the QR code on the pump
- Select 'Authorize Payment'
- Select a fuel grade and begin fueling
